### *What are creative and expressive arts?*

As a counselor or educator, sometimes you need to think creatively about how to reach challenging clients or students. Creative and expressive arts can enhance your work by showing you how to use healing stories, humor and your artistic nature. The arts have been found to be an effective technique in helping children and adults access deep emotions, and are appropriate with topics such as grief, bullying, addictions, sad and negative feelings, anxious thoughts, and much more.
